

**Jump from a simple application  
to a powerful GSM remote controller**

## GSM EXTENSION MODULE FOR MITSUBISHI ALPHA 2 XL

and derivate products

QUAD BAND

SIMPLE MECHANIC

INFRA RED LINK

SMS REMOTE CONTROL

GPRS TRANSMISSION

I/Os EVENT LOG FILE

SMS TO EMAIL

ENDLESS COMBINATIONS

EASY GPRS DATA LOGGER

ADDITIONAL I/Os

## GTM PLC

- The new GTM PLC extension module will transform your simple application controllers, MITSUBISHI ALPHA 2 XL and derivate products, to a powerful GSM remote controller.
- As final customers have all different requirements for a GSM remote control solution, the powerful flexibility of the ALPHA 2 XL in conjunction with the GTM PLC GSM functions will cover almost all of them. Based on flexibility, this whole solution will open doors to any imaginable project.
- Thanks to the simple mechanics and the infra red link between the ALPHA 2 and the GTM PLC, the installation and the use are much faster and more convenient. The user can get rid of his expensive and complicated actual GSM solution and turn to something more comfortable with more possibilities.
- Among all other GTM PLC features, the actual ALPHA 2 GSM modem users can turn to the GTM PLC solution without any hesitation, all GSM modem features are included in the GTM PLC.
- The SMS functionalities will allow almost any remote control actions on the ALPHA 2 outputs and internal values.
- An EVENT log file is included, allowing all I/Os changes, incoming and outgoing SMS to be saved in a log file and even upload it by GPRS directly to AXELPROD server for further consultation.
- The well known Easy Gprs Data Logger (EGDL) is a built in function, allowing the user to record unlimited number of ALPHA 2 internal values and have them on a AXELPROD back office service without moving from his desk.
- Additional I/Os are presented on the GTM PLC hardware in order to offer more alarming solutions and remote control actions for the final applications.
